

## BUILDING FOR THE FUTURE

### Well 24 Rehabilitation & Electrical Panel Upgrade Project

This project will supply and install a new motor auxiliary panel for the existing Supervisory Control and Data Acquisition (SCADA) at new location on south fence line. It will also construct a new concrete pad for the MCC, meter main and SCADA and includes the installation of a new conduit to the pump base and will make motor connections.

Current Status **CONSTRUCTION**

Estimated Schedule  
Winter 2021 - Winter 2022

#### Project Benefits

Well 24 plays an important role in MSWD's water distribution system. It is one of two wells that provide water to the Annandale Reservoir within the 1,400 pressure zone.

#### Budget

The budget for these projects is \$610,000 and is being funded through the capital improvements budget.

#### More Information

To learn more about this and other MSWD groundwater protection and conservation projects, please contact our Public Affairs Office at 760.329-6448 ext. 145.
