

CLASSIFICATION SPECIFICATION

LEAD FIELD OPERATIONS TECHNICIAN

DEFINITION:

Under general direction, leads crews and performs skilled work in the activities of the Field Operations Department including construction, maintenance, customer service, fleet and building maintenance, and meters; performs work on water production, distribution, and storage facilities; assists in training assigned staff; performs other duties as assigned.

DISTINGUISHING CHARACTERISTICS:

This is an advanced, lead level class for the performance of water construction, maintenance, customer service, fleet and building maintenance, and meter work. Incumbents perform and lead others in the full range of duties with minimal supervision, and may also perform the most complex aspects of work. This class is further distinguished from Field Operations Technician class in that the Lead positions assist in training staff and determining work methods and procedures in the field. Incumbents may be assigned to assume the duties of the Field Operations Supervisor in his/her absence.

SUPERVISION RECEIVED/EXERCISED:

Receives general direction from the Field Operations Supervisor. Exercises close to general lead direction and training over Field Operations Technicians.

ESSENTIAL FUNCTIONS: *(include but are not limited to the following)*

*Class specifications are only intended to present a description summary of the range of duties and responsibilities associated with specified positions. Therefore, specifications **may not** include all duties performed by individuals within a classification. In addition, specifications are intended to outline the minimum qualifications necessary for entry into the class and do not necessarily convey the qualifications of the incumbents within the class.*

- Provides lead work direction and training for field crews, and fully participates in performing the most complex construction and maintenance projects relative to the installation, maintenance, and repair of water facilities and equipment.
