

**Notice of Availability for
Mission Springs Water District
Addendum No. 1 for AD 12 Sewer
Improvement Project: 1998 (SCH#1998091062)**

Mission Springs Water District (District) has prepared an Addendum No. 1 for AD 12 Sewer Improvement Project: 1998 which recommends that this Addendum be adopted. The District has authorized the release of the Addendum No. 1 for public review and comment for the above project.

The Assessment District (AD) 12 Sewer Improvement Project is a proposal by Mission Springs Water District (District) to install approximately 57 miles of sewer pipelines and wastewater collection to developed portions of the City of Desert Hot Springs in Riverside County, California. All sewer lines would be installed and contained within existing public rights-of-way (ROW), mostly in paved roads. The Addendum addresses adding approximately 17,700 lineal feet (about 3.35 miles) of additional pipeline to the existing 57 miles of pipeline approved in 1999. If approved by the District Board, the whole 60.35 miles of pipeline would be installed over the next several years as funds are made available. The proposed sewer pipelines (made of Vitrified Clay Pipe [VCP]) will range from 4-inch diameter to 12-inch diameter and will be installed from 5-17 feet in depth. Approximately 300 to 500 feet of sewer would be installed each day.

The Board acting as the CEQA lead agency for this project will consider adoption of this Addendum No. 1 at their Board meeting on March 7, 2011. A copy of the Addendum No. 1 can be reviewed at the District's office listed below and on our website at www.ms wd.org. The 15-day period of review will be from February 11, 2011 to February 28, 2011. Written comments on this Addendum should be submitted to Mr. Brent Gray at the address listed below no later than February 28, 2011.
