

## Latest News

Mission Springs Water District's (MSWD) mission is to provide, protect, and preserve our most valuable resource - water. In support of this, we strive to be a trusted source of information first to our customer base and then to the regional community of professionals, industry groups, and the media.

What we do and how we do it isn't always straightforward, and we highly value and are committed to proactive, open, and effective communications with all of our audiences. From community outreach to digital marketing to door hangers to video production, we work to share important information to help customers and partners feel well-informed and engaged with our work and services.

The pages in this section of the website include press releases and other recent communications pieces. For the very latest information, follow us on social media using the links in the top navigation on every page of our website.

For media inquiries or communications requests, please email us at [pr \[at\] mswd.org](mailto:pr@mswd.org).
