

# San Geronio Pass Subbasin SGMA Compliance

## Groundwater Sustainability Agencies

The San Geronio Pass Subbasin is governed by three Groundwater Sustainability Agencies (GSAs): the Desert Water Agency GSA, the Verbenia GSA, and the San Geronio Pass GSA. Desert Water Agency has been designated an “exclusive” GSA over its service area in the eastern

most portion of the San Geronio Pass Subbasin. The Verbenia GSA consists of a one square mile area that overlaps the service areas of the Mission Springs Water District and San Geronio Pass Water Agency in the eastern portion of the San Geronio Pass Subbasin. The rest of the San Geronio Pass Subbasin consists of the San Geronio Pass GSA that includes the San Geronio Pass Water Agency, Banning Heights Mutual Water Company, the City of Banning, and the Cabazon Water District. The three GSAs are working collaboratively to implement the Sustainable Groundwater Management Act (SGMA) in the San Geronio Pass Subbasin.

## Groundwater Sustainability Plan

The San Gorgonio Pass Subbasin GSAs collaboratively prepared the 2022 San Gorgonio Pass Subbasin Groundwater Sustainability Plan (2022 San Gorgonio Pass Subbasin GSP). The GSAs adopted the 2022 San Gorgonio Pass Subbasin GSP following a public hearing on December 26, 2021, and submitted it to the California Department of Water Resources (DWR) on January 25, 2022. The 2022 San Gorgonio Pass Subbasin GSP and information about the development process can be found at [www.sgpgsas.org](http://www.sgpgsas.org). A copy of the 2022 San Gorgonio Pass Subbasin GSP can be found at [DWR's SGMA Portal](#). The GSAs will be required to submit an assessment and update of the GSP to DWR by January 1, 2027, and every five years thereafter.

## Annual Reports by Water Year

Upon approval of the 2022 San Gorgonio Pass Subbasin GSP by the DWR, the GSAs will be required to submit annual reports to the DWR pursuant to the SGMA by April 1, 2022, and every year thereafter.
